Annuscha Botes

South Africa | Remote Work Ready | annuschabotes@gmail.com | linkedin.com/in/annuscha-botes-swanepoel1989/

SUMMARY

Creative and highly adaptable professional transitioning from extensive small-business operations and administrative experience into UX/UI and digital design.

Brings more than 10 years of hands-on experience across administration, customer service, sales support, logistics, inventory management, business coordination and website-related work.

Alongside this professional background, has developed practical UX/UI and digital design experience through real-world projects including an educational website redesign, a personal author website and an original mobile game.

Comfortable taking a project from initial brainstorming and requirements gathering through wireframing, visual design, iteration, testing, implementation and hand-off.

Particularly interested in UX/UI design, responsive websites, educational technology, creative digital products and user-centered experiences.

EDUCATION

Secondary Education — Homeschooled from Grade 7 through matric

Matric completed: 2005

Subjects included: Mathematics Literacy, Agricultural Science, Life Science, Accounting, History, Information Technology, Consumer Studies, Music, Religious Studies, Visual Arts, Dramatic Arts, Hotel & Catering, Life Orientation, Afrikaans and English.

Primary School | 2006

- Supported Grade 1 and Grade 2 classrooms.
- Supported learners and assisted teachers.
- Filled in during teacher absences.
- Assisted with sports and school functions.

PROJECTS

Maori Learning — Educational Website Redesign | *Role: UX/UI Designer & Web Designer | Platform: Wix | Tools: Figma, Wix, ChatGPT, AI image-generation tools, Emergent Labs | Timeline: Approx. 2 weeks + 2 days post-handoff iteration*

- Redesigned an existing educational resource website providing worksheets, printable resources, videos, songs, flipbooks and learning materials for South African learners.
- Identified UX problems including outdated visual presentation, weak information hierarchy, cluttered product areas, confusing navigation, poor mobile layout, overlapping elements, limited trust-building content and unclear supporting information.
- Focused the design direction on simplicity, educational trust, accessibility, clear content hierarchy, friendly but professional branding, mobile responsiveness and maintainability.
- Designed a redesigned homepage, educational phase categories, improved shop presentation, Videos & Songs section, FAQ, About/Creator page, Contact page, Privacy Policy, Terms & Refund Policy, trust badges and social links.
- Improved SEO/searchability and metadata, created responsive mobile layouts and developed custom educational graphics and owl mascot artwork.
- Considered advanced solutions such as subscription-based access, membership-restricted resources and CMS filtering, then simplified features based on the client's comfort level and maintenance requirements.

- Completed the website hand-off to a satisfied client. Following hand-off, completed an additional two days of refinement and testing focused on social links and SEO/searchability.

Annuscha Botes Author Website — Personal Author & Creative Portfolio | *Role: UX/UI Designer, Web Designer & Content Creator | Tools: Figma, Codex, AI-assisted creative tools*

- Designed a personal author website to showcase books, creative projects, author identity and future digital products.
- Worked through brainstorming, information architecture, wireframing, visual direction, high-fidelity mockups, responsive design planning, content organization and AI-assisted implementation.
- Gained practical experience translating a creative personal brand into a structured and user-focused digital experience.

Hatchlings & Heroes — Educational Mobile Game | *Role: Game Designer, UX/UI Designer & Product Creator | Tools: Figma, Expo, VS Code, Codex, AI-assisted creative tools*

- Created an original educational mobile game concept combining collectible creatures with educational mini-games and progression mechanics.
- Designed experiences for Hatchling profiles, Nursery, Collection, Inventory, Shop, Hospital, Training, Practice Battles, Tournaments, Rewards, Quests and educational mini-games.
- Developed educational mini-game concepts and interfaces covering counting, colours, memory, numbers, shapes, feeding and other educational challenges.
- Continued iterating through debugging, testing and refinement of mobile interactions and user flows.
- Demonstrates the ability to work across visual design, UX/UI and digital product development.
